

HOSTED COLLABORATION SOLUTION FOR GOVERNMENT

Enabling Secure Anytime, Anywhere, Any Authorized Device Collaboration

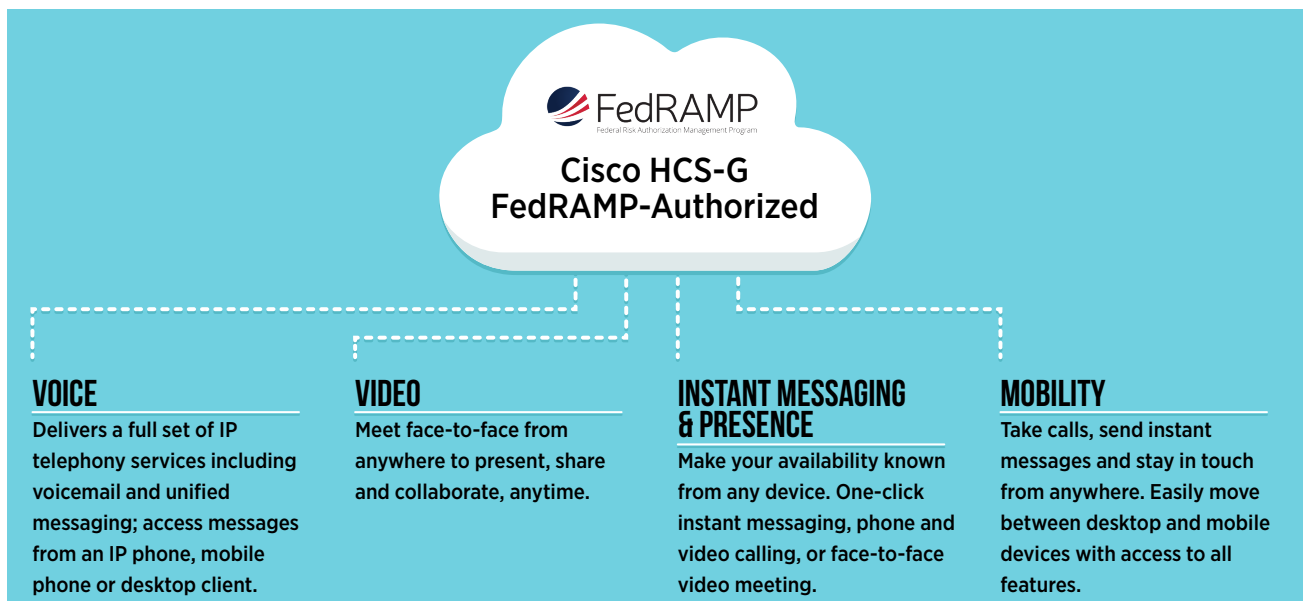

PRODUCTIVITY POSSIBILITIES

Collaboration is essential in today's workforce. We are no longer tethered to the office – working remotely with dispersed teams and 24x7 connectivity is the normal expectation. You need to be sure your teams can collaborate securely from their device of choice, from any location, and provide more responsive services to your constituents.

Offering the latest technologies in voice and video conferencing, web messaging, presence and instant messaging, Iron Bow Technologies is partnered with Cisco to provide their FedRAMP Hosted Collaboration Solution for Government (HCS-G).

COLLABORATION THAT WORKS FOR YOU – FEDRAMP-AUTHORIZED

Iron Bow's HCS-G, powered by Cisco, provides cloud-based unified communication and collaboration applications within a highly secure, virtualized platform, under a centralized management system. This approach meets federal cloud mandates, reduces costs and easily connects end users on any device, resulting in reduced IT complexity. HCS-G is easily scaled to the size of your agency – this flexible solution is your cost effective and secure answer to accelerated adoption of cloud services.

Cisco HCS-G technologies include:

Cisco Unified Communications Manager, Cisco Jabber, Cisco WebEx, Cisco Unity Connection, Cisco Unified Presence

WHY IRON BOW

Iron Bow works with you to leverage existing investments in hardware, IT infrastructure and software to meet your unique needs. Our partnership with Cisco is over two decades strong and we have over 50 Cisco Certified engineers offering services to the government and private sector. Our services range from consultation, planning, design, implementation, operations and network optimization.

BENEFITS

- FedRAMP-Authorized – secure cloud, built for government
- Increase team productivity – collaborate anywhere, supporting a mobile workforce
- Supports BYOD – flexibility for users to choose the best device for their needs
- Improve agency communications – advanced collaboration and messaging tools
- Reduce IT complexity – standardized and consolidated services and management
- Shift CapEX expenditure to OpEx – only paying for what you need as a service
- Free-up your IT team to focus on your agency's mission

Cisco HCS-G is FedRAMP-Authorized. FedRAMP provides a cost-effective, risk-based approach for the adoption and use of cloud services by U.S. government agencies. FedRAMP processes are designed to assist federal government agencies in meeting Federal Information Security Management Act (FISMA) requirements for cloud systems. To learn more about FedRAMP, visit fedramp.gov.

Strong. Our engineers are certified in the latest collaboration and unified communication technologies and will work with your agency to maximize efficiencies.

Flexible. Our solutions scale to meet your agency's ever-changing requirements with on-demand, pay-as-you-go options.

Targeted. We are laser-focused on implementing a solution to enable your agency to securely and confidently pursue successful mission outcomes.
