

NETCENTS-2 PRODUCTS CONTRACT OVERVIEW

NETWORKING, STORAGE, PERIPHERALS, MULTI-MEDIA, SOFTWARE AND IDENTITY/BIOMETRICS

Type: Indefinite Delivery/Indefinite Quantity (ID/IQ)

Contract Number: FA8732-13-D-0017

Authorized Buyers: Mandatory use by United States Air Force (USAF), and can be used by other DoD or Federal agencies in support of USAF or joint operations.

Expiration Date: November 5, 2018

OVERVIEW

The objective of the NETCENTS-2 Products acquisition is to provide cost effective and innovative net-centric products to support a wide-spectrum of missions for the USAF and joint warfighters, worldwide.

NETCENTS-2 Products will help forward an integrated and interoperable Defense Enterprise Infrastructure with the acquisition and implementation of common standard, network-centric products and solutions. The contract supports all major USAF cyber and cyber-supported missions and initiatives, satisfying warfighter requirements for emerging technologies, innovative communications, evolving information assurance capabilities, information services and infrastructure connectivity.

IRON BOW ADVANTAGES

- Over 30 years of USAF experience of fast, precise and compliant delivery
- Unmatched net-centric products distribution and customer support
- Highly skilled and credentialed engineers
- Leading-edge solutions from top-tier manufacturer partnerships
- Best pricing and ease of ordering to obtain “speed of need” capabilities
- Proven PMI-based delivery methodology and ISO 9001:2015 certified

PRODUCTS

NETWORKING EQUIPMENT	SERVERS/STORAGE	PERIPHERALS
Switches	Network servers	Processors/memory modules
Gateways	Operating systems	Video cards
Routers	Network Attached Storage (NAS)	Network interface cards
Firewalls	Storage Area Networking (SAN)	Keyboard/mouse
Wireless networking devices	Hard drive/tape drive array	Monitors, printers and scanners
Microwave & land mobile radios	External hard drives	Uninterruptible Power Supplies (UPS)
Satellite communication terminals	Optical drives	Cameras (web, network, wireless)
Voice over IP (VoIP)	Tape storage media	Keyboard/Video/Mouse (KVM)
Voice over Secure IP (VoSIP)	Portable storage devices	Switches
Network security appliances	All Microsoft network infrastructure role-based servers	Operating systems/licenses

MULTIMEDIA	SOFTWARE	IDENTITY/BIOMETRICS
Displays (plasma screens, HDTV, etc.)	Network Management	Electronic fingerprint images
Video devices	Server Virtualization	Iris images
DVD/VCR players	Collaboration	Face recognition
Video Teleconferencing (VTC) equipment	Security	Hand geometry
Text devices	Web development	Speaker recognition (telephony and web-based)
Audio devices	Backup/recover and archiving	SmartCard reader (fingerprint)
	Compliance	Fingerprint reader
	Asset management	PublicKey infrastructure (PKI)/Common Access Card (CAC) devices
	Information assurance	
	Virtualization management	

USAF EXPERIENCE

For over two decades, the USAF has counted on effective and innovative IT solutions from Iron Bow Technologies. Continuing the tradition of excellence and providing world class expertise today, Iron Bow is involved in supporting every USAF Major Command. Enabling mission assurance for joint warfighters around the world, Iron Bow has acquired, designed and integrated full spectrum solutions including:

- State-of-the-art unified communications, comprising of VTC, audio-visual displays and 130,000 VOIP and VOSIP phones worldwide
- Data center storage, backup/recovery and server consolidations in support of federal and DoD initiatives
- WAN and LAN upgrades including the extension of AFNet by integrating information transport nodes
- European enterprise IP call center
- First 400 feet turn-key voice, video and data throughout the Pacific
- Multi-disciplined, multi-solution integration for warfighters in AFCENT
